CSE0001: DIGITAL LITERACY PROJECT

VIT BHOPAL UNIVERSITY

NAME: DIVYANSH AGARWAL

BRANCH: CSE CORE

YEAR: 2025-2029

COURSE CODE: CSE0001

DATE:29th March, 2026

INTRODUCTION

This report documents my journey as a Student Digital Ambassador during my first year of B.Tech (CSE Core).
The goal of this project was to build a strong digital presence, improve communication skills, and understand cybersecurity.
Through various tasks, I developed practical knowledge of professional platforms and responsible internet usage.

By creating profiles on GitHub, LinkedIn, and Kaggle, I have started building my professional identity.
This project also helped me understand cyber threats like phishing and online fraud, making me more aware and cautious online.

TASK-1

In this task, I created an infographic using Canva. The aim was to spread awareness about digital literacy among students.

The infographic included:
- Meaning of digital literacy and its importance
- Useful tools like Google Scholar, Notion, and Quizlet
- Tips for writing professional emails

This task helped me learn how to present information in a simple and visually appealing way.

TASK-2

I created accounts on GitHub, Kaggle, and LinkedIn.

- GitHub: To showcase coding projects
- Kaggle: To explore data science and ML
- LinkedIn: For professional networking

I plan to regularly update these platforms to build a strong portfolio before graduation.

TASK-3

I chose HackerRank as my primary platform for coding. I successfully completed the beginner-level challenges in Python and earned my Bronze Badge. This practice helped me understand basic Python logic

Additionally, I used Google Forms to build a Digital Literacy Awareness Quiz. I created a Google Form with five specific questions to test how well my batchmates understand online safety, professional email etiquette, and technical tools. I also linked this form to a Google Sheet so I can easily track and analyze the responses.

These tools will be very helpful for my academic success over the next four years. HackerRank will help me prepare for technical interviews and improve my problem-solving skills for my B.Tech courses. Meanwhile, Google Forms and Sheets are essential for my role as a Student Digital Ambassador, allowing me to collect data and share helpful resources with my batchmates effectively.

TASK-4

Poor digital communication can create serious problems. For example, sending emails without a clear subject line may lead to them being ignored.

To avoid this:
- Use clear subject lines
- Maintain polite tone
- Keep messages short and clear

This ensures effective and professional communication.

TASK-5

While researching cybersecurity, I learned about phishing and UPI fraud.

I realized how scammers use social engineering to trick users. This made me more cautious.

Now I:
- Avoid clicking unknown links
- Use official apps for transactions
- Enable two-factor authentication

These practices help me stay secure online.

CONCLUSION

This project has helped me become a more responsible digital citizen.

In conclusion, completing these five tasks has been a transformative experience that significantly improved my professional and technical confidence. Transitioning from a passive

user to an active Digital Ambassador has taught me the importance of maintaining a clean digital footprint and practicing safe online habits. Mastering tools like Google Forms for data collection and drafting professional emails has prepared me for future internship opportunities at companies like Microsoft.
